## Testimonials

Quick Bid helps us increase our profit margins and cut our estimating by up to 25%.

- Mike Syzdek  
 President  
 BakerTriangle

On-Screen Takeoff and Quick Bid provide an incredible savings to us.

- Joel Heath  
 Project Estimator/Manager  
 MCG Commercial

As a family owned company, we trust Quick Bid to save us time and money on all of our bids.

- Crystal Fritts  
 Project Coordinator & Estimator  
 Heggem-Lundquist

Since 1988, On Center Software's focus is on the success of our customers. Customer success drives our business; from Development, to Customer Support, to Solution Training. There is a responsibility that comes with being the First Name in Construction Automation—it defines who we are; and **we are one of you.**

- Leonard Buzz  
 CEO  
 On Center Software

Everybody I know in construction uses On Center Software solutions and for good reason—it saves time and money.

- Jake Barry

# WHEN

## Quick Bid

On Center Software's Quick Bid (QB) set **THE STANDARD** in 1988 when it was introduced to Specialty Contractors. QB enables contractors to easily, accurately, and consistently increase project win rates and profit margins.

Estimation is the realization of winning a profitable bid with the right material and labor costs. Automating construction estimating with QB insures that estimators know the takeoff is accurately and instantly reflected in bid calculations.

On Center Software's QB delivers more than estimating, accuracy, efficiency, and savings—from quantity survey to bid tendering to project management.

### If It's Counted, It's Included!

**Additional info on QB:**

# YOU

- ➊ **Improve Ramp-Up Time** with trade specific databases in imperial and metric formats. Estimate more work in less time with confidence. Trade specific databases decrease the time to bid. Automatically incorporate OST quantity measurement changes.
- ➋ **Eliminate Discrepancies** using integrated quantity takeoff. Winning the right bids means bidding the right projects. Integrate the quantity takeoff automatically into the bid. Eliminate costly manual data entry and cost calculations. Adjust margins with confidence knowing the company's profit remains.
- ➌ **Gain Material Quotes** from multiple manufacturers and vendors. Include material and parts quotations from suppliers. Automatically, from within the estimate, submit material quotes. Select the supplier of choice and instantly incorporate prices into the bid. Retain supplier quotes and bids in a library for future reference.
- ➍ **Identify & Analyze Risk Factors** with visual indicators in estimates. Identify the right projects to bid. Know before submit time which project will be profitable. Be alerted visually when and where the project and profit are at risk. Proactively locate the acceptable bid threshold to make money on the project.

# BID

- ➎ **Improve the Bottom Line** with detailed price adjustments to overhead and profit margins. Replace gut-feel with certainty and improve margins. Make on-demand price adjustments with confidence. Drive consistency with specific databases and direct vendor quotes. Watch the impact to profit with adjustments to material or labor cost.
- ➏ **Measure, Analyze, & Report** on material, labor, equipment, subcontractor, waste, and other costs. Ongoing scrutiny ensures the best bid for the project. Quantifying the material waste before winning lowers costs. Gain accuracy by identifying and reviewing labor, subcontractor, and material costs. Compare quotes and costs for equipment and supplies in each area.
- ➐ **Pre-Construction Automation** with integration of OST and QB for optimal estimating. Driving efficiencies with estimation and trade specific databases. Eliminate manual entry errors with automatic updates between quantity changes and bid estimates.
- ➑ **Complete Project Life Cycle Automation** by bringing OST, QB, and DPC into the job. Spot labor production problems early to stay on time and within budget. Annotate plans, create RFIs, and communicate from the office or the field.

# WIN

I was using the product for about 6 months with minimal training. I decided to hop on a plane and come here from Australia. It was the best training. I really recommend it to anyone.

- Craig Jarvie, Founding Director, Consolidated Ceiling Services PTY LTD

Curriculum options for introductory, intermediate, and advanced skills:

- ➊ **Self-Guided Training** with Videos & Self-Help Guides
- ➋ **Orientation Webinars** using Digital Online Access
- ➌ **One-on-One Training** covering Personalized, Specific Content
- ➍ **Instructor-Led Training** with Multi-Company Trainees
- ➎ **Customized Classroom Training** for One or More People From the Same Company

Training options: [www.oncenter.com/training](http://www.oncenter.com/training)

## Support

I support nearly 600 software titles (packages) and I can say On Center has the best support of all of them...whether it be the web chat or telephone, I've never had a bad experience.

- Steve Battles, C&S Design Build

Technical support services:

- ➊ **24-Hour Support** every Business Day, Worldwide
- ➋ **Local Toll Free Numbers** for Australia, Canada, New Zealand, South Africa, United Kingdom, & United States
- ➌ **Instant Access** via the Online Live Chat, Support Online Forms, Remote Assistance
- ➍ **Self-Service Options** including Online Frequently Asked Questions, Help Tab Within the Products
